**Re.: REACH - Registration, Evaluation, Authorization and Restrictions of Chemicals”
nr. 1907/2006 CE**

Dear Customer,

The main goal of REACH Regulation is to improve the knowledge about hazards and risks related to both existing chemical substances (already on the UE market since September 1981) and the new ones (on the EU market after September 1981). At the same time, the Regulation is intended to maintain and to enhance the competitiveness and the innovation of the European chemical industry.

REACH is an integrated system for registration, evaluation and authorization of chemical substances, which is focused on the highest protection level for human and environment health.

The regulation is governed by ECHA, European Chemicals Agency, which provides continuous communications and information through guidance documents, practical guides, consultation procedure. These and other support tools are available on its own website <https://echa.europa.eu/it/home>.

Abet Laminati S.p.A. carefully follows the evolution of REACH regulation in order to guarantee the compliance of its products. This means Abet Laminati S.p.A. is very active in the control of its suppliers in order to verify their adjustment to the instructions fixed by the regulation.

The complete range of Abet Laminati S.p.A. has to be considered “articles” as defined by REACH.

Moreover, the Abet Laminati S.p.A. products:

- they do not contain substances that “are intentionally released in the normal use condition or reasonably expected” and therefore they do not need any kind of registration.
- They do not contain SVHC substances (substances of very high concern) that are included in the “candidate list”, that is the list of candidate substances candidate to be introduced in the list of “substances to be authorized” (annex XIV of REACH). This means that Abet Laminati S.p.A. does not need to give any notice to the agency according to art. 7(2) of REACH.
- They do not contain any dangerous substances in a concentration higher than 0.1% p/p. Therefore, Abet Laminati S.p.A. does not need to issue the Safety Data Sheet, as stated in art.31 of REACH.

Please consult the Product Data sheet PDS-01, concerning the handling safety instructions, on our website abetlaminati.com.

Since Abet Laminati S.p.A. established a periodic system of control, linked to the updating of the above mentioned list (SVHC), care of both its suppliers and competent Institutes, the present document shall be revised only in case of change to what reported.

We are available for any further information you may need.

Best regards
