

Bra, 25 March 2020

I think no more explanation is needed related to the difficulties that we are all facing in these extraordinary, difficult and unpredictable times.

ABET Laminati would like to thank you for the dedication, generosity and commitment of all our Employees and Partners. So far, we have managed to maintain production at acceptable levels, in full compliance with every accordance aimed to protect the health of our workers.

Unfortunately, however, most of our Customers have now suspended production; therefore, not only is the normal flow of orders missing, but also the possibility to deliver the ready-made goods.

We therefore decided to suspend our industrial activity starting from Monday 30 March. We will be maintaining the customer service operation (in 'smart working' mode) and guaranteeing the delivery of all that material already available in the warehouse, to cover orders already confirmed and any new orders you need from our Stock Collection.

Our intention, in compliance with the Government disposal and with the sense of responsibility towards the Community that since ever distinguish our work, is to reopen as soon as possible; but at this moment we are unable to indicate when that is likely to be.

Our goal is that we can resume business from Tuesday 14 April but we will keep you informed of any changes promptly.

With the confidence in the future that distinguishes those who work with seriousness and tenacity, we are confident that together, we will start again even stronger after passing these testing times.

Ing. Ettore Bandieri

ABET Laminati General Manager
