ITA Abet è attenta  
all'ambiente.

ENG Abet takes care  
about the environment.

ITA Il Laminato è costituito per circa il 70% da fibre cellulosiche e circa per il 30% da resine termoindurenti.

Non è classificato come materiale pericoloso e non richiede l'emissione di nessuna scheda di sicurezza.

Gli impatti ambientali del prodotto, lungo il ciclo di vita dalla culla al cancello, sono stati calcolati attraverso lo studio LCA e pubblicati attraverso l'EPD Print HPL Sottile e Print HPL Stratificato, dichiarazione certificata da parte terza.

Considerato il suo alto potere calorifico, il laminato Print HPL può essere destinato al recupero energetico in impianti di termovalorizzazione.

---

Per maggiori informazioni consultare sul sito [abetlaminati.com](http://abetlaminati.com) la brochure GoGreen.

ENG Laminate is consists of about 70% cellulose fibres and about 30% thermosetting resins.

It is not classified as dangerous material and it is not compulsory to issue any safety data sheet.

The environmental impacts of the product, along the life cycle from cradle-to-gate, were calculated through the LCA study and published through the EPD Print HPL Thin and Print HPL Compact, certified statement by the third party.

Given its high calorific value, Print HPL laminates can be used for energy recovery in waste-to-energy plants.

---

For further information, please have a look at the GoGreen brochure on [abetlaminati.com](http://abetlaminati.com) website.

ITA La fedeltà dei colori dei decorativi stampati non può che essere relativa. Su vostra gentile richiesta, sarà nostra cura inviarvi campioni e materiale informativo dettagliato.

ENG We remind you that accuracy of the printed colours can only be as good as the printing process allows. We will be pleased to supply you with the specific samples and literature.
